

Chapter 9. Working With Reports

9.1 Reports.....	1
9.2 Receiving and signing files from broker.....	12

This chapter describes requesting reports on operations performed on the broker's server.

9.1 Reports

Reports are a presentation of a client's transaction outcomes for a given period of time in a format defined by the broker.

This section describes the standard report forms provided by the QUIK system developer. Reports of specific brokers can differ from the provided examples in form and content.

The service of requesting broker reports from the QUIK Workstation is an additional capability of the QUIK system. This feature is enabled on your server after installation of the Report generation module.

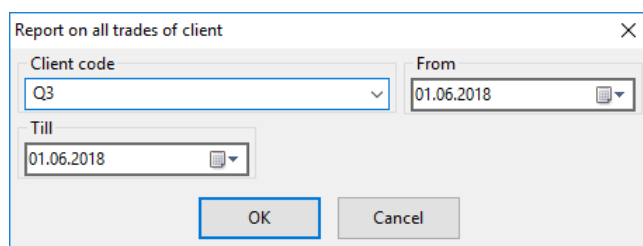

Prerequisites for using reports on a client's Workstation:

- a given user must be provided with access to reports on a QUIK server;
- the REPORTS.DLL file must be in the QUIK programs folder;
- the 'Reports' class must be included into the list of accepted classes.

If these conditions are fulfilled, the **Reports** item will appear in the program's menu.

9.1.1 Working principle

1. To get a report, select **Plugins/Reports** under the program menu and select there a required report type.
2. In the window that opens, select the client code, the start date and the end date of the report generation period. One date is specified for a client portfolio report. Then click the **Run** button. Your request will be sent to the server.

3. Once a report is received, a window will open to display it. A notification on the time when the report was received will also appear in the **Messages window**. Every received report is opened in a new window.
4. A received report can be copied to the Clipboard, printed out, saved as an HTML file or as a HTLM file with .xls extension. These actions are performed from the shortcut menu of the report view window.
5. If the received report shows empty tables or “No data”, this means that no operations were performed in the specified period.

9.1.2 Report on the client's portfolio

menu **Plugins/Reports/Report on the client's portfolio**

This report reflects the status of the client's assets on a specified day.

This report consists of three tables. The first table shows the quantity of instruments, the second table contains information on cash assets, and the third table contains the aggregate estimate of instruments as of the beginning and the end of the day. Currency in which final values are specified is set in the module BO.

This report contains the following parameters:

- **Opening balance** is the account status as of the beginning of the trading day;
- **Closing balance** is the account status as of the end of the trading day;
- **Opening valuation** is the value of instruments as of the beginning of the trading day;
- **Closing valuation** is the value of instruments following all trades as of the end of the trading day.

Broker confirms the correctness of the report

9.1.3 Report on all trades of a client

menu **Plugins/Reports/Report on all trades of client**

This report reflects all trades made by the client within a specified time period. The report also contains additional parameters:

Some parameters are displayed in the report if specific settings of Report generation module are configured in the Trades.ini file. See the comment to corresponding parameters.

- **Market** is a market name if it is specified for an instrument class.

The Market parameter is shown if ShowMarket=1 in section [DialogParams].

- **Currency** is the instrument quotation currency.
- * **Brokerage commission** is the broker's commission amount.
- * **Currency** is the trade currency.

(*) The Brokerage commission and Currency parameters are shown if ShowFaceUnit=1 in section [DialogParams] and [ShowBrokerComis] is filled.

- **Total commission of trading system** is the amount of the trading system commission.

The Total commission of trading system parameter is shown if ShowTSComis=1 and TotalComisTS=1 in section [DialogParams].

- **** ITS charges** is the MOEX commission under agreements for provision of the integrated technological service (ITS).
- **** Trade organization fee** is a commission charged by the market operator.
- **** Clearing commission** is the default clearing commission interest charged by the exchange for settlements under trades in all classes of instruments (trading modes) except for those that have this interest explicitly specified in the **Trading modes commission settings** section.

() The ITS charges, Trade organization fee and Clearing commission parameters are shown if ShowTSComis=1 and TotalComisTS=0 in section [DialogParams].**

- **Currency** is the trade settlement currency.

The Currency parameter is shown if ShowTSComis=1 and ShowFaceUnit=1 in section [DialogParams]

- **Settlement date** is the date of settlements under the given trade;
- **Margin** is the margin ratio calculated at the time of trade execution.
- ***** Portfolio value** is a portfolio value.
- ***** Min. margin** is a minimum margin. If the value is more than 10^{25} , then the INF value is displayed.
- ***** Init. Margin** is an initial margin.
- ***** Corr. Margin** is a corrected margin.

(*) The Portfolio value, Min margin, Init. margin, Corr. margin parameters are shown if ShowDiscountParams=1 in section [DialogParams].**

- **Funds level** is the funds adequacy level.

The Funds level parameter is shown if ShowFundsLevel=1 in section [DialogParams].

- **User ID** – UID of a user who sent an order.

Report example:

9.1.8 Report on client non-trade instructions

menu **Plugins/Reports /Report on client's non-trade instructions**

This report contains a list of all registered Non-trade instructions of the client for entering, withdrawal, or transferring assets between accounts within a specified period.

If the **Listing recipients** option is enabled at the time of the report generation, the report can contain instructions selected not only by the sending client's code, but also by the receiving client's code.

The first table contains the list of instructions for operations with cash assets, the second table contains the list of instructions for operations with securities, the third table contains a list of free form instructions.

Report example:

Client's non-trade instructions report									
Reporting period: 02.06.2014 - 06.06.2014									
Client: Spoursite B.B.									
Client ID: Q6

9.1.10 Report on negdeal orders

menu **Plugins/Reports/Report on negdeal orders**

The report reflects the statuses of the client's negotiated orders for a specified period and the total estimation of funds required for their registration and execution.

Report example:

[illegible]

9.1.11 Report on positions on the FORTS derivatives market

menu **Plugins/Reports /Report on positions in the FORTS derivatives market**

This report reflects positions and restrictions of the client on FORTS for the specified date.

Report example:

Report N1286

Report on the positions in the derivatives market FORTS
Date: 04.02.2020
Client name:
Client code: HF01001

Restrictions on client accounts (all sessions)

Limit type	Liquid. coef.	Prev. open limit	Open limit	Cur. net pos Blocked funds	Plan. net pos Free assets	Variat. margin	Accrued profit Var. margin of the intermed. clearing	Options premium Stock exchange tax Total var. margin of the day session	Stock exchange tax	Coeff. of client marginal requirements
Cur.	0.00	0.00	0.00	0.00	0.00	-160	0.00	0.00	0.00	1.00

The report consists of the following tables:

- positions on the end of the day;

- restrictions on client accounts (all sessions);
- Unified cash positions table.

Parameters of the report tables are similar to those of the Client account positions table, Client account limits table, and Cash positions table (for more details, see Chapter 3, “Viewing Information”, sub-sections 3.19, 3.18, 3.16).

9.1.12 Report on portfolio risk

menu **Plugins/Reports/Report on portfolio risk**

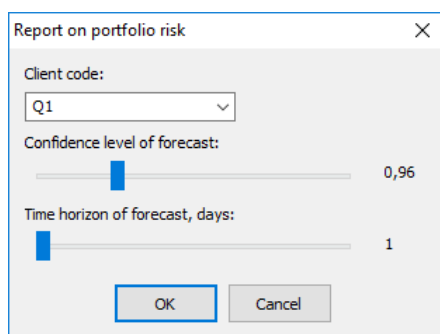

The report is intended to assess the risks using the VaR methodology. It allows estimating the most possible losses, which can arise as a result of market risk realization. The losses are calculated for a certain asset and portfolio in percent and money units.

The report reflects:

- for shares – an instrument contribution in the portfolio, risk measure in percent and money units, risk measure sensibility to the instrument contribution change, an instrument contribution in the portfolio risk measure;
- for bonds – risk measure;
- for derivative financial instruments – delta, gamma, vega coefficients.

Source data for report

In the dialog of request parameter entry, besides the code of client whose portfolio is calculated, it is necessary to specify the confidence level of forecast (from 0,90 to 0,99) and the time horizon of forecast in days (from 1 to 10).

The basic data for the calculation is price history for all assets and implied volatility for options.

The report is created based on the historical data of the Moscow Exchange instruments. The data is reported for:

- Shares, bonds – from 1 January 2016;
- Futures, options – from 7 July 2016.

Report parameters

The following parameters are shown in the report:

- **Price:**
 - For shares, futures, options – price in rubles;
 - For options – premium in rubles;
 - For index derivatives – price in points.
- **Portfolio structure:**
 - **Qty** – the asset quantity.
 - **Value** – the asset value is calculated by formula: $\langle \text{Price} \rangle * \langle \text{Qty} \rangle$.
 - **Weight** – the asset share in portfolio is calculated by formula:
 $100 * \langle \text{Asset value} \rangle / \langle \text{Sum of values of all assets in portfolio} \rangle$.
- **Historical return (HR):**
 - **%** – the asset return for the historical period.
 - **Compared to market (HR)** – the comparison of the asset and market returns. Possible values:
 - **Higher** – if the asset return is higher than the market return for more than 5%. The market return is the MICEX index return.
 - **Lower** – if the asset return is lower than the market return for more than 5%.
 - **Same** – if the return is within the interval of these values.
- **Common risks** – risks common for assets of all types:
 - **VaR, %** – the amount of the loss, which will not be exceeded with the probability, set in the **Confidence level of forecast** parameter, at the end of the time interval specified in the **Time horizon of forecast** parameter.
 - **VaR, RUB** – risk measure in rubles.
 - **VaR Contribution (VaRC), %** – contribution to portfolio risk from this position.
 - **Compared to market VaR** – the result of the comparison between the asset risk measure and the market risk measure. The market risk measure is the MICEX index risk measure. Possible values:
 - **Higher** – if the asset risk measure is two times and more higher than the market risk measure.
 - **Lower** – if the asset risk measure two times and more lower than the market risk measure.
 - **Same** – otherwise.
 - **Extreme loss probability** – assessment of probability of significant deviation of price fluctuations from the normal distribution. Possible values:
 - **High;**

– Low.

- **Risks of derivatives** – specific coefficients which are common for derivatives financial instruments only:

- **Greeks** – characterize the derivatives price sensitivity to changes in the following values:
- **Delta** – determines sensitivity of the derivatives price to change in the underlying asset price. Shows by how much would the derivatives price change if the underlying asset price were changed by one point.
- **Gamma** – measure the delta sensitivity, i.e. the change of delta on the underlying asset price by one point.
- **Vega** – characterize the option price (premium) sensitivity to change in volatility.

9.2 Receiving and signing files from broker

9.2.1 Purpose

The broker can transfer certain files, for example, reports that he prepared, to the client. The files can contain the sender's digital signature. The digital signature is verified automatically when the files are received. The client can use the digital signature to confirm a file if the brokerage service regulations so require, or confirm a file without using the digital signature (if no crypto-provider configured) or use a one-time password. The QUIK server registers receiving and confirming of files.

9.2.2 Received files

menu **Plugins/Reports/ Reports/Received files...**

Files are received automatically when the QUIK program connects to a server. When files are received, the form shown on the image appears in the QUIK program. If the broker sends files under digital signatures and unsigned files to the client at the same time, all received files will be divided into two groups to be displayed in different windows. If necessary, the window with the list of received files can be opened manually by selecting **Plugins/Reports/Received files** under the menu.

	File	Sender's signature	The sender's signature status	Certificate owner	Ascertain Center for a certificate	Serial number of a certificate
1	Report N301.htm	No				
2	Report N302.htm	No				

The **Received files** window contains the following information:

1. **Received files** specifies the number of received files.
2. **Folder** specifies the path to the default directory for archiving the received files. Files under digital signatures are saved to the **ReportsSigned** folder; unsigned files are saved to the **Reports** folder in the directory where the QUIK Workstation is installed.
3. **Open folder...** opens the window with the directory to which files are saved when received from a sender.
4. In the table with received files, each row corresponds to an individual file received. The columns display the following parameters:

Parameter	Purpose	
File	File name	
Sender's signature	–	Yes: the file is signed by sender;
	–	No: the file is not signed (in this case, do not fill in the following fields)
The sender's signature status	–	Yes: the signature is valid;
	–	No: the signature is invalid (in this case, do not fill in the following fields)

Parameter	Purpose
Certificate owner	Certificate owner name
Ascertain Centre for certificate	Name of the certification authority that issued the certificate
Serial number of certificate	The number of the issued certificate
Error	Error message
Signed	Yes: this file is signed by the user. Otherwise, do not fill this field

5. **Select all** – select all received files in table. Available if the table contains the files that require confirmation and for which **Digital signature** or **Without signature** confirmation method are selected (see [9.2.4](#)).

Received files for which Password confirmation method is selected (see [9.2.4](#)) can be selected only one at time.

6. **Clear selection** – deselect the selected files.
7. **Open file** button – view the received file (see [9.2.3](#)). Available if only one file is selected.
8. **Save as...** button – save the file to a selected folder. Available if only one file is selected, and a selected file should be received within the running session.

If you click the  button, the received files table editing window will open. In this window, you can configure displaying of the required columns.

9.2.3 Viewing files

Received files can be opened and viewed by clicking the **Open file...** button at the bottom of the window. Files are opened in external programs (for example, MS Excel) that must be installed on the user's computer beforehand.

The files are saved to a standard directory where only archive received files are stored. Therefore, a copy of the file is opened in a temporary directory without changing the file in a standard directory. If necessary, the file can be saved by user to another directory clicking **Save as...** button.

9.2.4 Signing files

When a client receives files a confirmation method corresponding to a received file can be selected. Depending on the settings of Report generation module, the following file confirmation methods can be selected in the **Confirm receipt** field:

- Digital signature – confirm a selected file using the digital signature certificate.
- Without signature – confirm a selected file

- Password – confirm a selected file using a one-time password. To request a one-time password from the Report generation module, click the **Get password via SMS** button. The received password should be entered in the field on the left. The field becomes active only the password is received and the 'Enter password' message appears. The number of attempts to receive the password and the number of one-time password entries attempts are configured by the administrator of the Report generation module. When reaching the maximum number of attempts, the user will lose the possibility to confirm the file using one-time passwords. It is possible to enter any of the received one-time passwords (the first one or requested later for this file).

Click **Confirm** to confirm a selected file.

If a confirmed file is selected, then the **Confirm receipt** field is not available.

Digital signature is generated by an external program that must be installed on the user's computer. Consult your broker about getting and installing such program.

Generated Digital signature will be registered on the broker's server. The result of the operation is displayed in the **Confirmed** column of the Messages window.

Files received by the user can be cancelled by the broker if they are not confirmed by the client. To cancel the unsigned files, the client must contact his broker. This procedure removes the relevant file from the list of received files.

| To confirm files (using any method), you must be connected to the server.

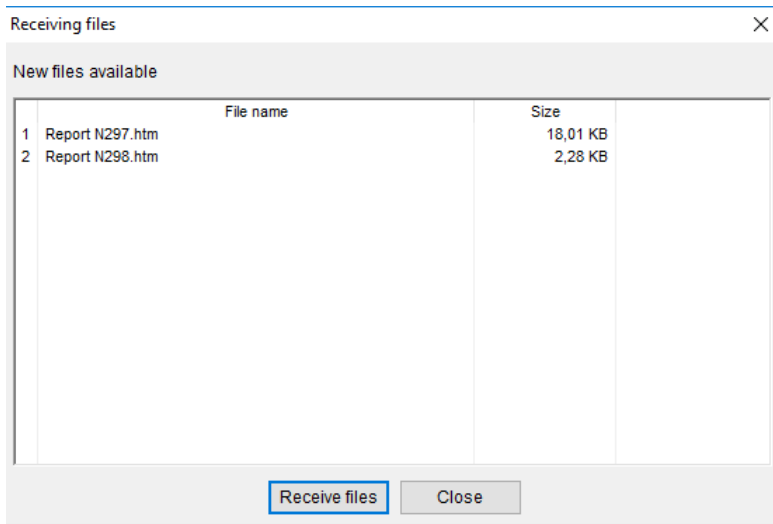

9.2.5 Receiving files

menu **Plugins/Reports /Receiving files...**

If the **Notify about new files** setting is enabled in the Report generation module, the files will be received in the moment of the QUIK program connection to the server and later as new files will arrive. The system notification appears and a menu item **Receiving files** becomes available under **Reports** when new files are received the current user session.

Each table in the table with received files corresponds to a separate file. The table columns display the following parameters:

Parameter	Description
File name	File name
Size	File size

By clicking **Receive files** the window **Received files** opens. All newly received files from the list are displayed in this window. As new files are received the **Receiving files** menu item removes from the **Reports** menu.
